Kaduna, Nigeria | (+234) 9061183640 | forfemi@gmail.com | linkedin.com/in/samuel-olorunfemi038783314

WEB DEVELOPER | FULL-STACK ENGINEER

PROFESSIONAL SUMMARY

Web Developer with 3+ years of experience building and shipping production-ready web applications. Specializes in Vue.js, React.js, Nuxt.js, Next.js, and TypeScript for full-stack development. Experienced in integrating payment systems (Paystack), cloud storage (Cloudinary), and backend services (Supabase, Node.js, Laravel). Proven track record of delivering client-facing platforms across e-learning, finance, and non-profit sectors in the Nigerian and African market.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, Vue.js, Nuxt.js, Quasar, React, Next.js, React Router, HTML5, CSS3, Responsive Design, Pinia, Zustand

Backend: Node.js, PHP, Laravel

Databases & Auth: Supabase, PostgreSQL, Row Level Security (RLS)

Tools & Platforms: Git, Figma, Vercel, Cloudinary, Paystack, Vite

Design: UI/UX Design, Graphics Design

PROJECTS

DigitalEd Hub - E-Learning Platform

Stack: Nuxt 3, TypeScript, Supabase, Tailwind CSS, Cloudinary, Paystack | digitaledhub.vercel.app

- Platform launch drove measurable business impact, contributing to a 10% increase in client revenue through successful course enrollments and sales.
- Integrated Paystack payment gateway for course enrollment, handling the full checkout flow including iframe-based popup and state capture.
- Designed and implemented a cookie-based admin authentication system independent of Supabase Auth, with protected dashboard routes.
- Integrated Google OAuth with a custom confirm.vue buffer page to resolve redirect loops and manage session hydration.
- Built core platform pages: admin dashboard, student registry, course upload with Cloudinary, community (posts, replies, likes), resources, newsletter, and settings.
- Configured Supabase Row Level Security (RLS) policies across multiple tables and resolved UUID/integer type mismatches in schema design.
- Implemented a student auto-logout composable using localStorage timestamps and page visibility events.
- Conducted thorough testing across auth flows, payment scenarios, and data access rules.

Deutsche Partners Holding (DPH) - Finance Website

Stack: Vue.js, Vite | Sole Frontend Developer (with backend developer) | dph-website-qeq8.vercel.app

- Developed the complete frontend for a professional finance and holdings company website using Vue.js and Vite.
- Collaborated with a backend developer, managing API integration and environment-based routing.
- Resolved CORS issues caused by trailing slashes in API calls between the Vue frontend and FastAPI backend hosted on Render.
- Implemented a mega menu with precise hover behavior and handled Vite static import constraints for dynamic asset paths.

Client Portfolio Website - Themofemi

themofemi-portfolio.vercel.app

- Designed and developed a personal portfolio website for a client, delivering a polished, fully responsive UI.
- Handled the full development lifecycle from design implementation to deployment on Vercel.

BCC Church Website

joinbcc25.org

- Built and deployed a website for a church, providing information, community outreach, and engagement features.
- Ensured the site was mobile-responsive and accessible to a 300+ audience.

WORK EXPERIENCE

Junior Front-end Web Developer Intern

Greysoft Technologies | Sept 2023 - Jan 2024

- Assisted in the development and maintenance of user-facing aspects of websites and web applications.
- Optimized web pages for fast load times and efficient performance.
- Used JavaScript and modern frameworks and libraries to create interactive elements and enhance user experience.
- Collaborated with UI/UX designers to implement design mockups and prototypes into functional web pages.
- Used Git for version control and contributed to code reviews, testing, and documentation.

UI/UX Design Intern

COLAB Kaduna State | Sep 2022 - Oct 2022

- Assisted in the design and development of user interfaces and experiences for digital products.
- Conducted user research to understand target audiences, their needs, and pain points.
- Created user personas, journey maps, and UX artifacts representing user behavior and preferences.
- Used Figma to design and iterate on UI elements under the guidance of senior designers.

Junior Software Engineer (Volunteer)

Kaduna Polytechnic | Jan 2019 - Sep 2019

- Contributed to development and implementation of a digital healthcare solution in a clinical setting.
- Assisted in designing software architecture and planning the development process under senior engineers.
- Wrote, tested, and maintained clean, efficient code implementing key features of the clinical software.
- Implemented design changes based on user feedback and usability testing.

EDUCATION

Bachelor of Science in Computer Science

Kwara State University, Kwara State, Nigeria
